Work Experience

Web Developer Intern | *Black March Studios*

May 2025 - September 2025

- Contributed to self-hosted open-source platforms including Plane, Teable, and Aptabase by developing production-grade frontend and backend features.
- Implemented OpenID Connect (OIDC)-based SSO authentication in Plane, improving enterprise authentication compatibility and secure access workflows.
- Built custom drag-and-drop issue reordering using Atlassian Pragmatic DnD with real-time UI synchronisation and optimised state management.

Projects

Peerchat | [Live link](#) / [Repo link](#)

- Engineered a peer-to-peer chatting platform using the MERN stack, with Socket.io enabling real-time messaging and seamless user communication. The system ensures low-latency message delivery for a smooth experience.
- Crafted a responsive and intuitive interface with Daisy UI and TailwindCSS, ensuring consistent usability across devices. The design enhances accessibility while maintaining a visually appealing layout.
- Incorporated Cloudinary for secure image uploads and Zustand for efficient state management, enabling smooth photo sharing and optimized performance with minimal re-renders.
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js, Socket.io, Zustand, Cloudinary, Daisy UI, TailwindCSS.

Blogosphere | [Live link](#) / [Repo link](#)

- Designed and implemented a full-stack blogging platform using React and TailwindCSS, providing a user-friendly interface with smooth blog posting and deletion functionality.
- Developed a robust serverless backend architecture leveraging Cloudflare Workers and Hono runtime, delivering high availability and reliability while significantly reducing infrastructure and operational costs.
- Integrated JWT-based authentication to establish secure access control, safeguarding user data and minimizing unauthorized access attempts through a streamlined and efficient login process.
- **Tech Stack:** React.js, TailwindCSS, Cloudflare Workers, Hono, JWT, PostgreSQL, Prisma ORM.

Image Echoes | [Live link](#) / [Repo link](#)

- Built a visually appealing and responsive photo gallery web app using React and TailwindCSS. Integrated Sanity CMS for efficient content management, allowing seamless updates and smooth user interactions.
- Deployed with secure and dynamic authentication system using Google Firebase. This ensured user access was restricted to authenticated routes, protecting sensitive features and enhancing security.
- Streamlined user data management with local storage sessions, ensuring a consistent user experience across sessions and enhancing user interactions such as photo uploads, comments, and saved posts.
- **Tech Stack:** React.js, TailwindCSS, SanityCMS.

Technical Skills

Programming Languages: JavaScript, HTML, CSS, TypeScript, Java.

Database: Postgres, MongoDB.

Libraries / Frameworks: React, Zustand, TailwindCSS, Next.js, Node.js, Hono, Prisma, Express.js.

AI Tools: Cursor, Antigravity, Claude Code, Local LLM Setup.

Developer tools: Github, Visual Studio Code, Docker, Cloudflare workers.

Coding Profiles

Leetcode: Solved 300+ problems across Different Data structures : leetcode.com/vigneshsadhu143/

Education

Geethanjali College of Engineering and Technology

November 2020 – June 2024

Bachelor of Technology in Electronics and Communication (8.40 CGPA)

Hyderabad, Telangana, IN

Sri Chaitanya Junior Kalasala

June 2018 – May 2020

TSBIE in Mathematics, Physics and Chemistry (90.3/100)

Hyderabad, Telangana, IN
